

# HIGHLANDER PAPER RECYCLING

## Your local recycling Partner

Closed "HL5" container: This walk-in container is fully lockable and has a padlock slot, allowing security of material at all times and is loaded via the rear doors of the container.

Cages / stillages / tubs: These collection systems are ideal for areas that have volumes of waste spread across wide areas, or ideal for internal storage of waste before being brought to a central point and are easily moved by forklift or pallet truck.

Open top "HL5" container: This container is designed to be loaded from over the side / from the top or can be loaded via the rear doors of the container

Compactor "HL5" container: These containers are specially designed to attach to compactor machinery allowing optimum payloads and are ideal for loose cardboard, printers waste, production spoils, converting operations or any other bulk generated operations.

Bags and tags: Ideal for smaller amounts of office paper for recycling or papers for security shredding, these bags are made with heavy duty polythene, designed for single use only and to hold office type papers safely and securely. We also offer paper bags as an alternative to plastic bags and these can be provided with self-sealing facility once the bags have been filled and are ready to be collected.

Moffett Mouny collections: This system is designed to allow collections of pallets or bales using our lorry mounted forklift – this is ideal for customers who have no forklift provision.

"At the peak of paper recycling since 2002"

### THE START OF OUR JOURNEY

Highlander Paper Recycling was formed in 2002 by Brian Bingham and Stephen Duffy, who have combined experience of over 60 years within the Paper Recycling Industry - unrivalled in Scottish market!

### ABOUT US

We are the largest independent waste paper recycling company in Scotland, recycling 1000 tons every week and selling our products all over the world. Our services include paper collections and recycling, reel handling and splitting, cardboard core and reel end recycling, paper-based product destruction, security shredding and provision of recycling machinery such as compactors and balers.

### PROCESSING FACILITIES

We operate 3 fully automatic baling machines, giving us one of the largest processing capacities in Scotland at 2000 tons per week. We also have the largest reel splitter in Scotland, a slow speed product destruction shredder, slow speed security shredder, 6 x JCB Tele-handlers and 3 x JCB material grabs, meaning we have a processing and handling solution to suit every need!

### RECOVERED PAPER COLLECTIONS

We have a wide range of collection systems available to customers, ranging from containers, tubs, cages, bale and pallet collections, for security shredding, product destruction and standard recycling collections where required. We operate a fleet of modern, efficient collection vehicles which all meet Euro 6 emissions standards.

### PAPER RECYCLING

We collect and recycle waste paper of all types and quantities, serving a wide range of customers and industries, such as printers, packaging manufacturers, retail and distribution, office and service-based businesses and many more. From cardboard to office papers, Highlander provide responsible, fully accredited and legally compliant recycling services all throughout Scotland and we sell the recycled paper to paper mills across the globe.
